PROFIL

I believe that Social Justice does not need to remain a dream. And I intend to work in its favour. This was why I chose to make a change – and started with myself. After a successful career in Finance and Controlling, I decided to change my profession and to study Social Work. During my studies I started to advocate-social inclusion of vulnerable and marginalised groups by working directly in and with the Community. Since my graduation I was working in an organisation whom work is dedicated to people with mental disorders and disabilities. I offer excellent qualifications in various fields. I am a dedicated worker and used to deliver high quality even under pressure. I am an excellent team player, openminded, empathetic, friendly and always curious in gaining more knowledge.

VALUES

I believe that every human being has the right to live the life they want, without being oppressed, discriminated and excluded. Not only as a Social Worker but also as a person I want to promote the well-being and inclusion of those individuals and groups, who are suffering from unequal treatment within our society. Although full social justice can never be achieved, I'm convinced, that working in its favour can get us closer than we might think.
